# Brancu Alexandru

I'm passionate about creating things. I like learning anything, from guitar to coding an Arduino to make a seven segment display count.

## EXPERIENCE

### TotalIT Development, Full Stack Developer — Remote

Apprenticeship
Sep 2022 – Oct 2022

I received tasks for a homework type project where I would create a basic authentication system using the same technologies that the company used in their day to day work.

## EDUCATION

### Pólo de Educação e Formação D. João de Castro, R. Jau, Lisboa, Portugal

03/02/2020 - 21/02/2020

IT training on general networking practices, network and Windows Server setup.

## PROJECTS

### Portfolio Website — www.alexandrubrancu.com

Jun 2022 – PRESENT

Simple page to showcase my projects, the technologies they were built with and case studies detailing what I learned.

### Gamefinder — Google Extension

Aug 2022 – Sep 2022

It allows you to view what game is featured in any video on almost every page of youtube before clicking on it. It has 18 users.

### Authentication App — Github Link

Sep 2022

A sign up, log in, log out system with good input field feedback.

## OPEN SOURCE

### github.com/codu-code/codu
Aug 2022

I worked on various small parts of the website, and on the repository itself.

### github.com/pkspyder007/codu-map
Jul 2022

I ported the entire project to the new version of a deprecated dependency (react google maps api).

## SKILLS

- JavaScript
- React
- SCSS
- PHP
- CodeIgniter 4
- MySQLi
- XAMPP
- jQuery
- Git
- Webpack
- Photoshop

## LANGUAGES

- English
- Romanian
